

We develop, commercialize and license high performance materials that give our customers Power Through Technology.

WHO IS INTERFACIAL SOLUTIONS AND WHAT CAN THEY DO FOR ME?

Interfacial Solutions, LLC is a privately held technology development and transfer organization located in River Falls, WI.

Our 15,000 square foot lab facility is dedicated to helping organizations in the plastics industry successfully address their technological challenges.

We deliver power through technology for customers by providing them with timely and effective solutions that utilize our expertise in materials science.

Interfacial Solutions

Power Through Technology™

SERVICES & CAPABILITIES

- Adhesive Materials and Processing
 - Composite Materials and Processing
 - Interfacial Modification
 - Nanotechnology
 - Plastics Additives
 - Specialty Compounding
-

CHARACTERIZATION/TEST EQUIPMENT

- Chemical Composition
 - Color
 - Flame Retardancy
 - Mechanical Properties
 - Moisture Content
 - Morphology/Dispersion
 - Rheology
 - Specific Gravity
-

PROCESSING & MANUFACTURING EQUIPMENT

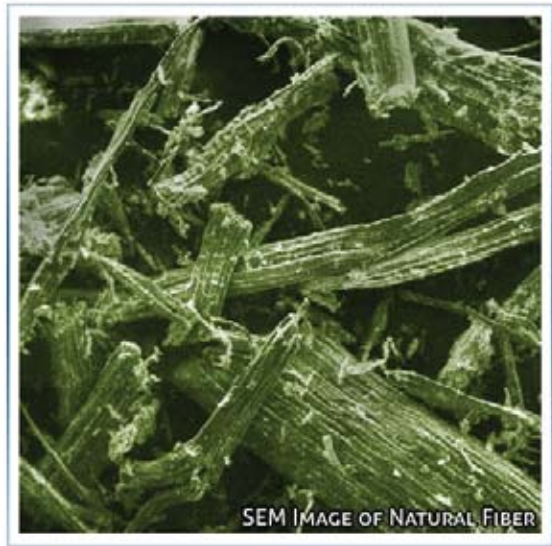

- 58mm Parallel TSE
- 50mm Parallel TSE
- 38mm Parallel TSE
- Two 27mm Parallel TSEs
- Conical Lab TSE
- 3/4 Inch SSE
- 85 Ton Injection Molder
- Pelletizing Equipment
- Composite Decking Line
- Blown Film Die
- Cast Film Dies
- Multiple Profile Extrusion Dies
- Lab Grinding Capabilities
- Resin Drying Capabilities

Interfacial Solutions

Power Through Technology™

COMPOSITE MATERIALS AND PROCESSING

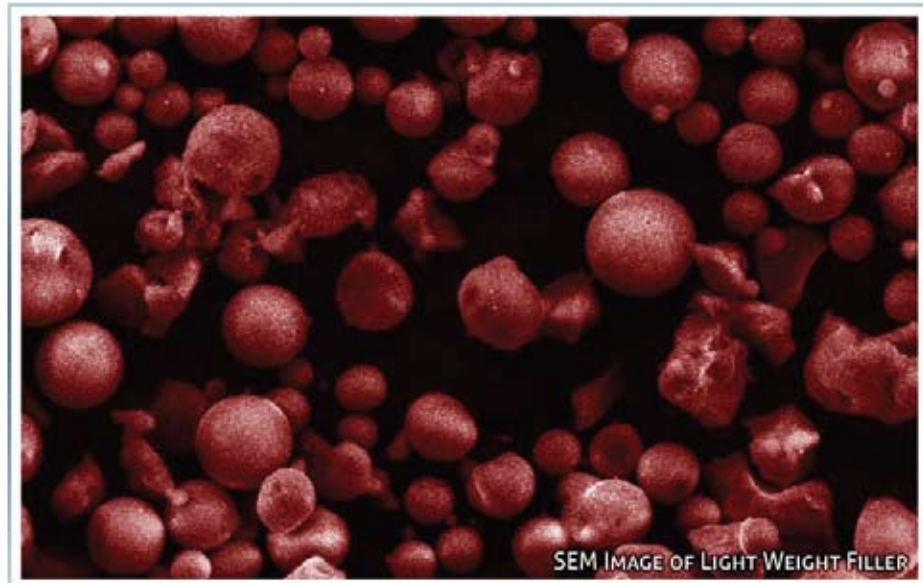

Interfacial Solutions specializes in the custom formulation and processing of high performance composite materials; including natural fiber filled composites. We have the ability to develop, prototype, and produce composite materials using a variety of melt processing techniques; including twin-screw compounding, profile extrusion, injection molding, and thermoforming.

PLASTICS ADDITIVES

Interfacial Solutions specializes in developing additive technologies that provide unique functionality into plastics.

We have extensive experience with additives that are designed to modify interfacial properties, including coupling agents, compatibilizers and surface modifiers.

Interfacial Solutions

Power Through Technology™

SPECIALTY COMPOUNDING

Interfacial Solutions has specialty compounding capabilities. We focus on smaller volume, value added materials, but can produce up to truckload quantities. We have extensive expertise in handling difficult to process materials. Currently we process highly filled materials, moisture sensitive materials, biomaterials and high performance materials. Interfacial Solutions is committed to offering specialty compounds with undeniable value propositions.
